Executive Summary

This report fulfills the requirements detailed in Chapter 326, Laws of 2002, Section 1(2)(a)(iii). The legislation instructed the Department of Social Health Services (DSHS), Children's Administration (CA), in cooperation with the Office of the Superintendent of Public Instruction (OSPI) to convene a workgroup. The workgroup was directed to prepare a plan to address educational stability and continuity of school-age foster children who enter into short-term foster care. The plan was to specifically address the following:

1. Ensure the best interests of the child are a primary consideration in the school placement of a child in short-term foster care.
2. Determine the current status of school placement for children placed in short-term foster care.
3. Identify options and possible funding sources from existing resources that could be made available to ensure that children placed in short-term foster care are able to remain in the school where they were enrolled prior to placement.
4. Submit recommendations to the legislature by November 1, 2002

Recommendations are presented which address how to ensure school placement as a best interest consideration when a child is placed in out of home care. Data that represent an overview of the current status of school placement for children placed in short-term foster care are also included in the report. A lack of data regarding the number of foster children enrolled in any given school district and statewide variance in school district practices in providing transportation prevented the group from presenting a **statewide** plan for maintaining foster children in their home schools within available funding.

In addition to addressing the specific legislative mandates the group also identified practice changes that would increase collaboration and communication between CA and OSPI and maximize the likelihood of foster children being able to remain in their home school. Whereas the group was not able to develop a statewide plan for maintaining foster children in their home school (*the school where they were enrolled prior to placement*), many of the recommended practice changes could be accomplished within existing resources. Some of the practice change recommendations include:

1. CA and OSPI should develop a formal policy statement that maintains foster children in their home school whenever practical.
2. CA and OSPI should develop and issue materials that reflect the prescribed policy for distribution to their respective personnel and interested parties.

3. Foster parent recruitment priorities should shift to develop more foster homes in school districts with high rates of foster care removal.
4. An oversight committee comprised of staff from CA, OSPI, and advocacy agencies should be established to develop best practice standards to maintain foster children in their home whenever practical.
5. CA and the Administrator of the Court (AOC) should work together to ensure educational stability is addressed during the shelter care hearing by the local CA social worker and the presiding Judge and/or Commissioner.

I. INTRODUCTION

In November 2001, the Washington State Institute for Public Policy (WSIPP) published a report that examined the educational attainment of children in foster care in Washington State. The report revealed there is a significant gap in the educational attainment between foster children and other students. Some of the factors that affect this dynamic include pre-care experiences such as neglect and abuse, poverty, emotional challenges, behavioral issues and instability. The report states: *“Repeatedly changing schools disrupts the educational process and can hinder a child’s ability to learn and succeed academically.”*¹

To address the issue of educational stability, the 2002 legislature passed Chapter 326, Laws of 2002, Section 1(2)(a)(iii). This law instructs Children’s Administration (CA) in cooperation with the Office of the Superintendent of Public Instruction (OSPI) to convene a workgroup to focus on this issue.

The task of the workgroup was to develop a plan to:

1. Ensure the best interests of the child are a primary consideration in the school placement of a child in short-term foster care.
2. Determine the current status of school placement for children placed in short-term foster care.
3. Identify options and possible funding sources from existing resources that could be made available to ensure that children placed in short-term foster care are able to remain in the school where they were enrolled prior to placement.

Recommendations were to be submitted to the legislature by November 1, 2002. This report contains the recommendations of the workgroup.

For the purpose of this report the following assumptions were applied:

- ***Foster care*** is limited to placement of a child in a CA out-of-home placement and does not include children placed through private agencies.
- ***Short-term foster care*** is defined as placement of a child in a CA out-of-home placement for 75 days or less.

¹ Burley, Mason & Halpern, Mina, *Educational Attainment of Foster Youth: Achievement and Graduation Outcomes for Children in State Care*. Washington State Institute for Public Policy, November 2001.

- A *child's home school* is the school where the child was enrolled at placement.
- The *data pool* used for this report includes school age children who entered a CA out-of-home placement July 2001 through June 2002.
- The data collected to represent the "*current status of school placement for children placed in short-term foster care*" is represented by:
 - a) Number of removals and placements of school age children by month and by school grade level as designated by the age of the child.
 - b) Number of school age children in CA placement in special education.
 - c) Number of school age children in kinship care that remained in their home school/district.
 - d) A composite at two different periods in time of the number of school age children in placement who changed school when placed.

II. CURRENT STATUS OF SCHOOL PLACEMENTS

1. Number of removals and placements of school age children by month and by school level as designated by the age of the child.

During the time period of July 1, 2002, through June 30, 2002, **3,674 school age children** entered a CA out-of-home placement. Appendices 1 and 2 reflect a district breakdown of the removal district and the placement district. The total number of removals/placements by month is reflected in Table 1.

TABLE 1

**Number of *REMOVALS/PLACEMENTS* of
School Age Children
July 2001 – June 2002**

| Age | J | A | S | O | N | D | J | F | M | A | M | J | Total |
|--------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|-------------|
| 5-10 | 150 | 176 | 138 | 160 | 140 | 151 | 162 | 153 | 156 | 154 | 190 | 128 | 1858 |
| 11-13 | 49 | 62 | 65 | 84 | 85 | 57 | 77 | 65 | 89 | 56 | 89 | 54 | 832 |
| 14-18 | 72 | 89 | 87 | 89 | 78 | 91 | 96 | 65 | 89 | 61 | 106 | 61 | 984 |
| Total | 271 | 327 | 290 | 333 | 303 | 299 | 335 | 283 | 334 | 271 | 385 | 243 | 3674 |

2. Number of school age children who entered a CA out-of-home placement between the months of July 2001 and June 2002 who were in special education.

To capture the number of children in this data pool who were in special education, information which indicated if a child had an Individual Education Plan (IEP), as noted on the Kidscreen evaluation, was used.² This information indicates that **516 or 14%** of the **3,674 school age children** who entered a CA out-of-home placement during this time period were receiving special education services. This information is reflected in Table 2.

² Kidscreen is a screening program for children placed in out of home care for more than 30 days. The screening is completed within the first 30 days of placement.

TABLE 2

School Age Children in CA Placement in Special Education

July 2001 – June 2002

| Children without an IEP | AGE (years) | TOTAL |
|---------------------------------|------------------------|--------------|
| | 5-10 | 1592 |
| | 11-13 | 699 |
| | 14-18 | 867 |
| | Total | 3158 |
| Children with an IEP | AGE (years) | TOTAL |
| | 5-10 | 266 |
| | 11-13 | 133 |
| | 14-18 | 117 |
| | Total | 516 |
| Total Sum of 5-10 years | | 1858 |
| Total Sum of 11-13 years | | 832 |
| Total Sum of 14-18 years | | 984 |
| Total Sum | | 3674 |

3. Tables 3.A and 3.B reflect the number of children in kinship care that remained in their home school/district. Of the **3674** children placed during this time period, **744 or 20%** were placed with a relative at their initial placement. Of the **744** children placed with relatives, **393 or 53%** had to change schools at the time of placement.

TABLE 3.A

School Age Children Placed in Relative Care

July 2001 – June 2002

| Non Relative Placement | AGE (years) | TOTAL |
|---------------------------------|------------------------|--------------|
| | 5-10 | 1392 |
| | 11-13 | 659 |
| | 14-18 | 879 |
| | Total | 2930 |
| Relative Placement | AGE (years) | TOTAL |
| | 5-10 | 466 |
| | 11-13 | 173 |
| | 14-18 | 105 |
| | Total | 744 |
| Total Sum of 5-10 years | | 1858 |
| Total Sum of 11-13 years | | 832 |
| Total Sum of 14-18 years | | 984 |
| Total Sum | | 3674 |

TABLE 3.B
**School Age Children in Relative Care and
School Placement Status**
July 2001 – June 2002

| Relative Placements where the school stayed the same. | AGE (years) | TOTAL |
|---|--------------|------------|
| | 5-10 | 211 |
| | 11-13 | 83 |
| | 14-18 | 57 |
| | Total | 351 |
| Relative Placements where school changed. | AGE (years) | TOTAL |
| | 5-10 | 255 |
| | 11-13 | 90 |
| | 14-18 | 48 |
| | Total | 393 |
| Total Sum of 5-10 years | | 466 |
| Total Sum of 11-13 years | | 173 |
| Total Sum of 14-18 years | | 105 |
| Total Sum | | 744 |

4. Table 4 represents a composite at two different periods in time of the number of children in placement who changed school when placed. The composite group consisted of **588** children placed in a CA out-of-home placement in October 2001 and April 2002. Information for this group focused on the child's school status and how long after placement the child was attending school. The data indicate **478** or **81%** of the children attended school after they were placed in out of home care. Of this number, **183** or **38%** of the children had to change schools at the time of placement. The data further reflect a majority of the children, **338** or **71%**, were able to resume their school attendance within 3 days.

TABLE 4

**Composite of Children in CA Placement and
School Placement Status
October 2001 and April 2002**

| Did the Child Attend School after Placement? | | |
|---|--|------------|
| YES | How many children had to change school? | 183 |
| | | |
| | Attended school in 0-3 days | 338 |
| | Attended school in 4-5 days | 45 |
| | Attended school in 6-10 days | 24 |
| | Attended school in 11-30 days | 21 |
| | Attended school in more than 30 days | 5 |
| | Total | 478 |
| NO | Returned home before attending school. | 55 |
| | Other | 55 |
| | Total | 110 |
| Grand Total | | 588 |

III. SUBCOMMITTEE OVERVIEW

Three subcommittees were established to more sufficiently address the major areas that would need to be considered to ensure the goals of Chapter 326, Laws of 2002, Section 1(2)(a)(iii), were accomplished. The areas of focus for the respective committees were policy and practice implications, impact of confidentiality statutes, and transportation options.

Practice and Policy Implications: This committee focused on identifying ways to facilitate greater cross system collaboration between CA and OSPI and to identify barriers that would impede this process of collaboration. The subcommittee was able to identify practice areas, which if improved, would result in greater school stability for foster children and assure that school stability is considered in the best interest determination. Many of these recommendations do not require additional funding and could be implemented with minimal impact on the respective systems. Recommendations included:

1. Requiring the establishment of regional protocols between CA and the school districts with high removal and placement rates.

2. CA should emphasize placements that allow children to remain in their home school whenever feasible. Whether or not children remain in their home school, social workers or their designees should notify the school when a child is removed into state-licensed care.
3. Foster parents or the social worker should notify the school where a child is being enrolled of the child's foster care status at the time of enrollment.
4. Schools should identify a person in the child's school to be an in-school adult contact for the child.
5. CA and the Administrator of the Court (AOC) should work together to ensure educational stability is addressed during the shelter care hearing by the local CA social worker and the presiding Judge and/or Commissioner.
6. Related parties (including advocacy groups, DCFS, and other entities involved in the judicial process) to support statewide utilization of a judicial checklist to be used by Judges and Commissioners with regard to educational stability.
7. Focus foster parent recruitment efforts in school districts with high rates of foster care removals.

More specific recommendations of this subcommittee are contained in Appendix C.

Impact of Confidentiality Statutes: This committee focused on investigating potential legal barriers to providing school continuity for children placed in foster care. The committee focused on ability of schools and CA to share confidential information pursuant to arranging transportation for foster children. The committee received joint feedback from the Assistant Attorneys General (AAG) representing CA and OSPI respectively. The AAGs indicate current laws do not impede the sharing of information. However, the legal status of the child limits the degree of detail that may be shared between the respective systems, unless protocols are established in which birth parents specifically permit information sharing early in a child's placement. The opinion also stated a social worker or a foster parent can inform the school of the child's foster care status at the time of enrollment.

More specific recommendations of this subcommittee are contained within Appendix D.

Transportation Options: This committee focused on identifying options and possible funding sources within existing resources which could be made available to ensure that children placed in short term foster care are able to remain in their home school where they were enrolled at placement. Due to a lack of data regarding the number of foster children enrolled in a given school district and the variable practices in providing transportation of school districts across the state, this committee was not able to identify a statewide option. Some districts are able to integrate the transportation needs of foster children into their current transportation cost while others are not. It was not clear to the committee why some districts were able to provide this resource and others were not. Further information is needed to determine what factors contribute to the ability of districts to provide this service and how that can be duplicated.

The committee discussed the feasibility of utilizing McKinney Education Funds for Homeless Children and Youth to fund a transportation plan for foster children. These are federal funds that are designed to address the ongoing educational needs of homeless children and youth. The committee concluded that if a plan were implemented to target these dollars for foster children, then homeless children would go unserved. There were no viable options for expansion of these funds to cover both population groups.

The committee recommended that, if additional funding is made available, a statewide plan require CA to assume responsibility for providing transportation for the first 5 days. This is important because a significant percentage of children who are placed in a CA out-of-home placement are returned home within 48 hours. If a child remains in care beyond the initial court hearing, which occurs within the first 72 hours of placement, then a transportation plan could be arranged with the local school district.

More specific recommendations of this subcommittee are contained within Appendix E.

IV. CONCLUSION AND RECOMMENDATIONS

The workgroup was directed to prepare a plan to address educational stability and continuity of school-age foster children who enter into short-term foster care. The plan was to specifically address the following:

1. Ensure the best interests of the child are a primary consideration in the school placement of a child in short-term foster care.

2. Determine the current status of school placement for children placed in short-term foster care.
3. Identify options and possible funding sources from existing resources that could be made available to ensure that children placed in short-term foster care are able to remain in the school where they were enrolled prior to placement.
4. Submit recommendations to the legislature by November 1, 2002

Recommendations were presented which would ensure school placement as a best interest consideration when a child is placed in out-of-home care. Data that represent an overview of the current status of school placement for children placed in short-term foster care were also presented. A lack of data regarding the number of foster children enrolled in any given school district and statewide variance in school district practices in providing transportation prevented the group from presenting a **statewide** plan for maintaining foster children in their home schools within available funding.

In addition to addressing the specific legislative mandate, the group also identified practice changes that would increase collaboration and communication between CA and OSPI and maximize the likelihood of foster children being able to remain in their home schools. Whereas the group was not able to develop a statewide plan for maintaining foster children in their home school (*the school where they were enrolled prior to placement*) within available funding, many of the recommended practice changes could be accomplished within existing resources. Some of the practice change recommendations include:

1. **CA and OSPI develop a formal policy statement that maintains foster children in their home school whenever possible.**
 - CA and OSPI to develop an interagency agreement that addresses confidentiality and sharing of information between the agencies.
 - Regional Division of Children and Family Service (DCFS) offices develop protocols with the respective school districts in their regions specifying strategies for communication, coordination, and collaboration in order to maximize the educational continuity and achievement for foster children.
 - CA social workers notify respective schools when a child is placed in out-of-home care and when returned home from out-of-home care.

- CA social workers or foster parents notify schools at time of the child's enrollment of the child's foster care status.
 - School districts designate the Homeless Coordinator as the contact person for transportation arrangements for foster children.
- 2. CA and OSPI develop and issue materials that reflect the prescribed policy for distribution to their respective personnel and interested parties.**
- Clarify legal parameters related to the sharing of confidential information between DCFS and local schools.
 - Develop an informational brochure for school personnel that explains what it means for a child to be a foster child.
 - Develop information about school-based foster parent recruitment to be used at by the local Parent Teacher Association (PTA) or other entities that could assist with identifying foster parents.
- 3. Foster parent recruitment priorities should focus on development of more families in school districts with high rates of foster care removal.**

Preserve existing state funds for foster parent recruitment as the budget is evaluated for possible cuts.

- 4. Establish an oversight committee comprised of staff from CA, OSPI, and advocacy agencies to develop best practice standards to maintain foster children in their home school whenever practical.**
- Look at results of Mount Vernon pilot project and identify ongoing implementation issues that require legislative intervention.
 - Establish standards on coordination of services and collaborative case planning between CA and OSPI on a statewide and local level.
 - Consider inclusion of foster care status in OSPI's core student record database.

5. CA and the Administrator of the Court (AOC) should work together to ensure educational stability is addressed during the shelter care hearing by the local CA social worker and the presiding Judge and/or Commissioner.

- Training for Juvenile Court Judges and Commissioners
- Utilize the Judicial Checklist developed by TeamChild.

APPENDIX C

PRACTICE AND POLICY SUBCOMMITTEE REPORT

This committee focused on identifying ways to facilitate greater cross system collaboration and to identify barriers that would impede this process. The subcommittee was able to identify practice areas, which if improved, would result in greater school stability for foster children.

DIVISION OF CHILDREN AND FAMILY SERVICES (DCFS)

- Following the guidelines developed to ensure compliance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA), prioritize the establishment of administrative agreements between local districts and regional DCFS offices in 2003. These agreements should outline strategies for collaboration, communication and decision-making for foster children. The first group of agreements should be established between DCFS and school districts with high removal and placement rates.
- Routinely share aggregate data between school districts and regional offices to track changes in the educational outcomes of kids in foster care. Relevant data includes test scores, attendance records and disciplinary procedures.
- Develop regional strategies for proactive, cross system planning and service collaboration (including transportation) for each child (e.g. Child Protective Teams involve school personnel, IEP teams involve DCFS personnel, Student Intervention Teams include decision-makers from all relevant systems).
 - ❑ Document the foster parent's role in school.
 - ❑ Create a social work protocol for educational planning at placement that establishes:
 - 1) The birth parent(s) release to permit exchange of educational records and to permit collaborative educational planning between school and DCFS.
 - 2) The birth parent's role in school; permitted contact/visitation with the child at school
 - 3) The foster parent's role in school
 - 4) The need for a surrogate parent for special education decision making

- ❑ Create a social work protocol for reporting to the court the child's educational status and plan at the shelter care and each subsequent hearing.
- ❑ Recognizing that the first priority for DCFS is to place children removed from their birth families with relatives, there is still a significant need for placement in state licensed homes and facilities. This work group recommends that DCFS emphasize placements that allow children entering state-licensed, out-of-home care to remain enrolled in the school the child attended before removal.
 - 1) Revise existing risk assessment tools to determine safety risks of local placement for children, caregivers and schools.
- ❑ Through existing contracts with foster care recruitment agencies and within Division of Licensed Resource (DLR) target foster care recruitment to schools and districts in which there are high child removal rates in order to develop adequate numbers of in-district placements to ensure continuous enrollment. School-based recruitment will target school employees and parents with messaging about "taking care of our own children." These resources will be reserved for placements that preserve a child's school continuity, service, community and family connections.
- ❑ Identify schools with high removal rates and invite them to collaborate in foster home recruitment.
- ❑ Minimize the amount of time the child is out of school or in transition.
- ❑ Notify the school administration, by the social worker or designee, when a child is removed from the birth family to enter state-licensed care, enrolled for the first time in a school or returned to the birth family.
- ❑ Notify a school when a child will no longer be enrolled.
- ❑ Transfer educational information between any subsequent caregivers and birth parents providing placement for the child.
- ❑ Utilize the educational protocol to assure educational planning occurs for each child.

Licensed Caregivers

- Provide routine contact with school and service providers. Decision-maker for routine school activities and services.
- Share child-specific, relevant, medical, social, behavioral and academic information with school and social worker.
- Register children for school and other services. When a school change is necessary because transportation cannot be provided, enroll youth in school within 48 hours.

School Districts

- When a child is identified as being in foster care, immediately assess academic and behavioral needs and provide needed referrals and services.
- Identify a person to be the child's in-school adult contact – being a guardian angel, advocate and a supporter. Inform the caregiver the name of the person fulfilling this role.
- Assure that services and support are provided while at the same time maintaining privacy and dignity. Help the student function in the context of the entire school. Avoid contributing to any perceived stigma of foster care.
- Determine whether a child needs a “surrogate parent” assigned for special education decision-making. Promptly appoint a surrogate parent when needed. A surrogate parent is a term under the Individuals with Disability Education Act (IDEA) and is specific to special education students. A surrogate parent is a person who is appointed by a school district to act in place of a parent or guardian of a special education student.
- When a child is placed in foster care while remaining enrolled in the original school, communicate within the school any information needed to assure the safety of the child and school community. Follow existing procedures for child protection.
- Redact identifying information about the substitute caregiver from the child's educational records.
- Schools with high removal rates collaborate with the local recruitment resources to recruit foster families designated to serve those schools.

Cross System Education

- Develop and distribute an educational brochure about foster care for school personnel to every school employee (*draft nearly complete on 9/26/02*).
- OSPI, Court and DCFS collaborate to offer training about:
 - 1) How each system works
 - 2) Services available in each system
 - 3) Advocacy in each system
 - 4) Strategies for helping foster kids improve in school
- DLR develop or conduct foster parent training that addresses:
 - 1) Systems education
 - 2) Special safety and birth parent contact issues in placements which assure school enrollment continuity.
 - 3) Safety for children and caregivers
 - 4) Educational advocacy
- Existing Resources:
 - 1) *Endless Dreams* curriculum for schools produced by Casey Family Programs
 - 2) Educational Advocacy training and manual produced by Team Child
 - 3) Educational Service Districts

Court

- Support widespread use of Judicial CheckList regarding meeting and improving the educational needs and outcomes for youth in out of home care created by Team Child.
- Social Worker, CASA volunteer, child's attorney appraise the court of unaddressed needs or problems in the child's educational life.

- Provide case specific orders regarding education issues if needed.
- Appoint a guardian ad litem for a child who is the subject of an action under Juvenile Court Act, Dependency and Termination of Parent-Child Relationship, unless a court for good cause finds the appointment unnecessary (RCW 13.34.100).

APPENDIX D

CONFIDENTIALITY SUBCOMMITTEE REPORT

This committee focused on investigating potential legal barriers to providing school continuity for children placed in foster care. The committee focused their discussion within the context of provision of transportation services and the ability for schools and Children's Administration (CA) to share information related to the establishment of these arrangements. The committee has therefore analyzed the legal issues of sharing confidential information between school districts and CA. The issues have been outlined in a question answer format:

Q: Is there a legal barrier to establishing a policy that indicates CA will notify schools when a child has been placed in foster care?

A: No. A point established throughout the memorandum prepared collectively by the Office of Superintendent of Public Instruction (OSPI) and CA Assistant Attorney Generals (AAG), was that they could find no legal barrier to CA (*DCFS social worker or foster parent*) sharing information with the schools that a child had been placed in foster care. In fact, to best provide for the child's needs, this practice is encouraged in law (RCW 26.44.030(7)). Therefore, there is legal support for establishing a policy that directs CA to share information about a child's foster care status with the school.

Q: Does this also pertain in an emergent custody situation where a court has not yet ordered that the child be placed in foster care?

A: Yes. This exchange of information is also applicable during an investigation into a child's health, safety or welfare. Professional school personnel, which includes teacher, counselors, administrators, child care facility personnel and school nurses, are "mandated reporters" and are required to report suspected child abuse or neglect per RCW 26.44.030(1). The law further states that the department or the investigating law enforcement agency shall have access to all relevant record of the child in the possession of mandated reporters and their employees.

Q: Can the schools share information with CA regarding a child that has been placed in foster care – prior to the child being named a dependent or if the child has been placed through a voluntary placement agreement?

A: Yes. Prior to a child being named a dependent or when a child is placed under a voluntary placement agreement, the consent of a parent or a judicial order is required for a school to release a child's education records. A social worker may request the judge intervene during a shelter care proceeding to address this matter. Either the judge may order a parent to sign a release for the education records, or can include language in the court order instructing the child's school district to release the education records.

Q: Can the foster parent act as an agent of the department and receive information – including but not limited to the child's education record – directly from the school?

A: There is a need for additional clarification with regard to schools sharing information with foster parents. The statute authorizes the department to disclose educational records to a foster parent but it is not clear as to whether schools can disclose educational records directly to a foster parent. The only circumstance under which a foster parent seems to be able to be provided with information directly from schools is when they have also been named the surrogate parent as defined by the Individuals with Disability Education Act (IDEA). It is clear that foster parents can share certain information with the school but it is not as clear as to what information schools can share directly with foster parents. Prior to the establishment of policy language related to this issue it is recommended that CA and OSPI seek clarification from the respective AAGs.

Q: What kind (or level) of information can one school district share with another when a child is transferred to another district after being taken into physical custody by Children's Administration?

A: Upon enrollment, a new school district must request from the previously attended district the student's permanent record, including records of academic performance, attendance, disciplinary action, immunization records, and history of violent or criminal behaviors as listed in RCW 13.04.155. The previous district must transmit the records as soon as possible, but in any case within two days after receiving the request per RCW 28A.225.330.

Children's Administration may share limited information on dependent children placed in foster care with the appropriate school districts. Additionally, foster parents may provide information to impacted schools regarding children placed in their home. Further, school districts may communicate with one another to disseminate necessary information in order to arrange transportation to the foster child's home school.

The current laws do not impede the sharing of information; however the degree of detail that may be provided is limited, and has been defined for these purposes by the collective opinion prepared by the OSPI and CA AAG representatives.

APPENDIX E

TRANSPORTATION SUBCOMMITTEE REPORT

This committee focused on identifying options and possible funding sources from existing resources which could be made available to assure that children placed in short term foster care are able to remain in the school they were enrolled prior to placement.

Optional funding sources that might be used to meet additional demands upon the school transportation system included:

State Funding for School District Transportation

The current transportation funding is provided to school districts based upon a one-week student transportation count performed in October of the school year. It is not responsive to changes in the demands placed upon a particular district during the course of the school year. If there is an increase in the placement of foster children into a particular district which would necessitate an increase in transportation cost, there would be no way for the district to adjust it's funding level to meet this increased demand. Current funding level is estimated to cover only 70% of the transportation costs incurred.

Without significant changes in the funding amounts and methodology this funding is neither adequate nor flexible in covering any costs of providing new transportation for children placed in foster homes.

McKinney Vento Funding

The McKinney Education for Homeless Children and Youth program provides federal funding to states for the purpose of supporting district programs that serve homeless students. Annually, Washington receives between \$350,000 and \$450,000 in McKinney-Vento funding which is made available to local school districts serving homeless students. Competitive grants are offered annually with awards going to districts with the greatest need. This federal funding is the only money specifically designated for serving this needy population of students.

In Washington State there are currently nine school districts and three Educational School Districts (ESDs) receiving grants. They serve approximately 1,800 of the nearly 20,000 homeless children and youths in our state.

Some material was provided to the subgroup concerning the utilization of these funds for children in foster care. The funding provided under this act is an allocation to the state of Washington and is not flexible. A decision to use these funds for foster care children would reduce the level of funding provided to services for homeless youth.

TRANSPORTATION DISCUSSIONS AND RECOMMENDATIONS

1. *A recommendation* is made to expand the pilot study that was a part of Chapter 326, Laws of 2002, Section 1 (2)(a)(iii) to include additional districts. The current study incorporates Mount Vernon and Nooksack Valley school districts and is slated to run from April 30, 2002 through June 30, 2003.
2. The database used by CA does not track school information of either the child's home or the foster homes where the children are placed. This resulted in a lack of usable information to assist the subgroup in determining the extent of transportation services required for foster children placed out of their home school building area. Aggregate level information of removals and placements within the school districts was created for the committee based upon zip code of the residences and foster homes but data at a level that would indicate the number of children removed and placed within their own home district was not available.

A recommendation is made to enhance CA's ability to track school information that includes both the child's residence and the foster home where the child was placed.

3. Current practices for school districts providing transportation to foster children are not known because many districts are unaware as to the foster care status of these children.

A recommendation is made to perform a study and/or survey by OSPI to determine how districts are currently handling the requests for out-of-district or out-of-school transportation requests for foster children.

4. DSHS has limited authority to work/communicate on behalf of children with schools and others until the Shelter Care hearing is held. This hearing is held within 72 hours after removal. A large percentage of children are returned home after this hearing. For children that remain in foster care, frequently their placement will change from the initial receiving home placement after this hearing. This change in location makes it difficult for OSPI to explore transportation options for a child prior to the stabilization of his/her placement.

A recommendation is made that when considering the development of a transportation plan, DSHS maintains responsibility for the child's transportation until after the shelter care hearing. Implementation of this recommendation could not be accomplished within available funding.

5. Although school districts have no legal obligation to provide transportation to basic education students residing in their districts, school districts that do provide transportation are assumed to generally be able to provide transportation to children placed within their original school building catchment area at no additional costs. Frequently, but not always, school districts may be able to take advantage of existing transportation provided within the district to transport foster children from one area of the district to another to attend the school of origin. The specific ability of a district to provide such transportation within district would have to be determined on a case by case basis.

A recommendation is made that after the shelter care hearing the CA social worker should consider the following transportation resources when establishing a transportation plan for a foster child:

- a. Schools
- b. Foster Parents
- c. Volunteers
- d. Mass Transit
- e. Treehouse and other community groups

A further recommendation would be for school districts to designate a single point of contact for the CA social worker to work with in determining transportation options available from the school district.

6. Children placed out-of-district in foster homes may present unique challenges to a school's transportation system. If CA is unable to place children within their home districts when such placement is appropriate, it cannot be assumed that transportation can be provided at no additional cost by school districts. Interdistrict routes, although not uncommon, cannot be assumed to be available in all districts or always appropriate for transporting foster children. In some districts, transportation equipment and personnel may have to be acquired to provide any additional services required for foster children. Additionally, issues of school district responsibility for providing such transportation would have to be resolved. Would it be the new foster home resident district or the school of origin responsibility to provide such services? Without consideration of an additional funding resource the subcommittee

was unable to identify consistent, available options for providing transportation services to children placed out of their home school district.

APPENDIX F

LIST OF PARTICIPANTS

- 1. Avery, Janice (Co-Facilitator)**
Treehouse
655 S. Orcas Street, Suite 220
Seattle, WA 98108
- 2. Anderson, Jonnel**
Senate Republic Caucus
PO Box 40439
Olympia, WA 98504-0466
- 3. Behrman, Hillary**
TeamChild
1120 East Terrace, Suite 203
Seattle, WA 98122
- 4. Brodie, Calvin**
OSPI – Director of School Apportionment and Financial Services
PO Box 47200
600 Washington Street SE
Olympia, WA 98504-7200
- 5. Brubach, Stephenie**
Lutheran Community Services/Families for Kids – Recruitment Resources
223 N. Yakima Avenue
Tacoma, WA 98403
- 6. Burrus, Sue**
WA State Association of CASA/GAL Community Relations Coordinator
603 Stewart Street, #206
Seattle, WA 98101
- 7. Cornell, Adam**
Formerly of Casey Family Programs
- 8. Daly, Alyson**
DSHS – Children's Administration
Management Services Division
HIPAA Program Manager
PO Box 45710
Olympia, WA 98504-5710

9. Feinstein, Nadine

CPS Social Worker
DSHS – CA Region 4 – Kent Office
1313 West Meeker, Suite 102
Kent, WA 98032
